Assessment Strategies- Domain Specific Test

Department Level/Domain Specific Test

Department level or Domain Specific tests are also administered by different departments to identify the learning levels of the freshmen. A student who is more proficient in one course may not have the same learning level in another course. So, domain specific tests are administered to identify students with different capabilities. This test analyses the capabilities of a student in the major course he will undertake at Marian. Personal Interactions by faculty advisors also helps in identifying advanced/slow learners.
